1. The preliminary amendment filed Feb. 22, 2005 has been entered.
2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. The disclosure is objected to because of the following informalities: appropriate ones and forms of the headings listed in paragraph 4 below must be inserted into the specification, preferably by Applicant.

Appropriate correction is required.

4. The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

#### **Arrangement of the Specification**

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.

Art Unit: 2856

(e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.

(f) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(g) BRIEF SUMMARY OF THE INVENTION.

(h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(i) DETAILED DESCRIPTION OF THE INVENTION.

(j) CLAIM OR CLAIMS (commencing on a separate sheet).

(k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

5. The drawing sheet replacing the drawing sheet showing Figs. 3-4 was received on Feb. 22, 2005. These drawings are acceptable.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claim 1-14 and 16-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For clarity in claim 1, line 7 " that " should apparently be replaced with - - - wherein - - -. Similarly in claim 11: in line 9 " for determining " should be replaced with - - - including; in line 12 - - - and - - - should be reinserted after the comma and in line 14 before the period - - - is calculated - - - should be inserted. Claim 11 is additionally unclear in that while it is claimed as an apparatus there are no discernable apparatus limitations therein.

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

9. Claims 1-2, 9, 11-12 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Waldman et al US 4,350,50.

Note abstract, Figs. 1-2 and claims 6 and 8. Note two signals of different duration started at the same time can be monitored in parallel. Either such signal could apparently be considered a first signal.

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. Claims 4-6, 8, 14 and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waldman et al.

Waldman et al does not disclose the relative effect of the two fluctuations but it would have been obvious to choose one as greater if desired or to ease variation in range coverage of the system. Incorporation of similar such circuits into an integrated semiconductor as a self test would have been an obvious expedient to ease manufacture of such systems and to allow ease of calibration since building of similar

Art Unit: 2856

such self test circuits in integrated circuits is well known to be useful. The number of the base period selected would have been a matter of convenience.

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references show frequency or period monitoring in circuitry.

13. Claims 3, 7, 10 and 13 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
